

The plastic (PPS) pH sensor with single junction/6 kg Model : MDPHS106

- Ceramic hole reference electrode seepage interface, not easy to plug, suitable for high pollution wastewater monitoring
- High strength glass bulb design, the outer tube is stronger
- Special anti-fluorine material, resistant to the corrosion of fluorine on the electrode in water
- Measured range: 0~14 pH Optimal range: 2~12pH)
- Temperature range: 0~100°C
- Pressure: 0~6kg
- Seepage interface: Double salt bridge ring scrub

Address: 7191 Yonge street, Toronto, Canada
